

BOAT WORKS

NEW GEAR

By Michael Hauenstein

■ The HoverCover is a solar-powered floating boat lift and cover system from Sunstream Boat Lifts. As the 12-foot-wide hydraulic FloatLift raises the boat out of the water, the HoverCover lowers over the vessel. The cover automatically rises as the lift lowers when launching the boat. The HoverCover system works in slips and at moorings, according to the manufacturer, and eliminates the need for other covers. It's rated for boats up to 6,000 pounds, according to Sunstream. Average price for a combination HoverCover and FloatLift is about \$14,000. Sunstream Boat Lifts, Kent, Wash. Phone: (253) 395-0500. www.sunstreamcorp.com
