SUNSTREAM T-CANOPY | \$2,499

With high temperatures expected this summer, boaters aren't the only ones who need a little protection from the sun. Form and function come together in the new T-Canopies by Sunstream. Designed to shield boats from the elements, birds and airborne debris, they can be used in either fresh- or saltwater where water levels fluctuate less than 3 feet. The canopies are durable with a sag-proof fabric cover and drill-less assembly, and mount to most freestanding boat lifts. The effect maintains a clean architectural design, preserving views along the waterfront.
